Impact Factor Of Journals 2014

History. The impact factor was devised by Eugene Garfield, the founder of the Institute for Scientific Information (ISI). Impact factors are calculated yearly starting from 1975 for journals listed in the Journal Citation Reports (JCR). ISI was acquired by Thomson Scientific & Healthcare in 1992, and became known as Thomson ISI. In 2018, Thomson ISI was sold to Onex Corporation and Baring ...

Impact Factor - Directory Indexing of International ...

Thus, the impact factor of a journal is calculated by dividing the number of current year citations to the source items published in that journal during the previous years. The impact factor is a very useful tool for evaluation of journals, but it must be used discreetly.

Journal impact factor(JIF)

A journal's impact factor is a measure of the frequency with which an average article in a journal has been cited in a particular year. The following list highlights some recent SRP-funded publications in high impact journals. The New England Journal of Medicine (impact factor: 70.670) Lancet (London, England) (impact factor: 59.102)

High Impact Journals (Superfund Research Program)
