The original C35's don't have many electronic parts. So there's not much else electronic to go bad (just mechanical). The majority of Konica C35 light meter problems are from a broken wire or bad connection. This can be caused by battery corrosion. Overview. This little gem is almost the same size as our Canon Sure Shot Classic 120 (which I think Canon intended to look like the 'Classic' rangefinders that the Konica C35 was contemporary with). The Konica C35 FD is the most underrated 35mm film camera I've shot in years. The lens however, is not. There are countless online forums, where techies froth over the absurdly sharp lens (again: to search online in English you'll find it under the western moniker of 'Auto S3').

I wanted the camera for pocketability and use, and ended up buying a Konica S3 instead (same lens, but brighter at f1.8) and with the bonus of shutter priority override and ISO 800. The C35 is a great camera still - I'd prefer to buy a Konica C35 than any of the other clones. This is the cult camera of the 70's!
